Issues & Current situation
Roadmap
Community Expectation
Q&A

SOGo in numbers as of March 2023

64 Github contributors as of today (excl. translations)

371 subscribers and public support contributors

100+ premium support contract

- 50% Germany
- 25% France
- 15% Europe

43 languages supported

Issues & Current situation as of March 2023

- Support ThunderBird 102 & >, SOGo connector is not fully compliant (only Caldav, careful 106 will drastically change)
- Caldav: patch on 2.0 for Mac users on Ventura
- EAS 16: in evaluation
- Improve search criteria

Community Expectation

- Delete emails older than ndays
- Set calendar settings: in a global move for providing API
- SSO support
- Forwards & replies with inline images (solved)
- PGP Support for encryption

Roadmap 5.8.2

5.8.2 released the 28th of March

- Improving TOTP Confirmation code before validating the 2FA
- Support of Ubuntu 22.04
- Shared address book / calendar / email folder: possible to remove sharing capabilities
- Fix for old Chrome version (login loop)
- Deactivate EAS information in users prefs if EAS UI element (SOGoEASDisableUI) is setted at yes in sogo.conf
- Fix for Apple Calendar Ventura
- Update Transifex API
- New notification management spliting system & user notification
- Forwards & replies with inline images
- · Alert on closing calendar appointement, to avoid misclick
- Fix on segfault TNEF
- Moving email between cross mailboxes instead of copying
- Add punycode (RFC 3492) to encode domain with special characters

Roadmap 5.9/5.8.x

5.9/5.8.x

- Managing Password policies
- Adding an image in signature
- Call an external API (ie. For copying text in another application)
- Setting optionnal the creation of new identities
- In forwarding mailbox, autocompletion
- Setup the use of defined signature in forward/reply
- Sort by recipient (in all folders)
- Search by date / range of date
- Support of Centos Stream 9 / RockyLinux9 / Alma Linux 9
- Importing calendar / contacts in CSV format
- Captcha on login page
